HOW IT WORKS

Please Note:

- _Economy and Regular Photo Print Scanning is a high volume, automated scanning process. We cannot guarantee image quality or individual evaluation of images based on this process. This process is great for digital picture frames and digital sharing, etc.
- _Archival Photo Print Scanning is also an automated high volume system, however, this 1200 dpi scan is slower and a higher quality than the Economy and Regular scan.
- _We recommend the Archival scanning to provide high quality preservation for future generations scrapbooking, digital scrapbooking, photo books and printing.
- _for Photos with copyright symbols on them: We can scan them if permission is granted by the copyright owner, or if you agree to sign a waiver that you will only be using the disc we make as a backup of the material you legally own and not for resale or other commercial purposes.
- _SHIPPING: Free delivery in Elk Grove, CA only. Drop off & Pick up is available by appointment. All shipping fees is the responsibility of the buyer
- _Updated-2010-01 (sc4d)
